Founding Product Builder

OllieBoard

2024 – PRESENT

Founding Product Builder working within a small team to build the first version of OllieBoard, an operational guidance system for QSR's. Led product vision, discovery, and early execution from concept through live pilots.

Conducted 30+ discovery interviews with franchise owners and operators to validate problem space and shape product direction.

Designed and built the initial OllieBoard platform, including sensor hardware, sensor software, and the full operational workflow system.

User Experience Designer

HourWork

2019 – 2024

Joined HourWork at the start of its seed round and built the core platform from the ground up, helping the company scale to ~\$5M ARR and a successful Series A.

Designed, built, and launched the HourWork platform from scratch using Bubble.io, serving 10,000+ franchise users.

Led the design and no-code engineering effort for 3 years.

Guided successful migration to a React-based architecture for long-term scalability.

Designer & Developer

Stone Showcase

2018 – 2019

Worked as both a designer and developer for a national manufacturing company.

Led redesign of company's brand and digital presence, including complete rebuild of website and marketing materials.

Developed custom plugins to manage inventory, display product lines, and automate customer surveys.

Design Consultant

2015– 2018

Completed over 100 freelance design projects working one-on-one with clients. Designed websites, wireframes, logos, and more.
